FS LINE RETROFIT

DECONTAMINATION AND SEALING OF LIDS IN PRE-CUT REELS

Plant-based dessert

Dairy products

IMPROVE PRODUCTIVITY, HYGIENE, SUSTAINABILITY
& REDUCE COST

PRIMOREELS INNOVATIVE LIDDING SYSTEM

- Precut lids in reels
- PP, PET natural or aluminized
- Premium lid, superior print quality

Thinner material

Puncture safe lids
Avoid the use of a cover lid

Easy peel

DECONTAMINATION BY CLARANOR PULSED LIGHT

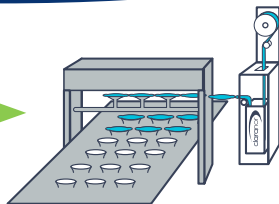

- Powerful : Log reduction > 3 to 4 on moulds and bacteria
- No chemicals
- Low energy consumption
- Non thermal treatment adapted to thin films

INCREASE PRODUCTIVITY & HYGIENE

Continuous check and refill of lids magazines

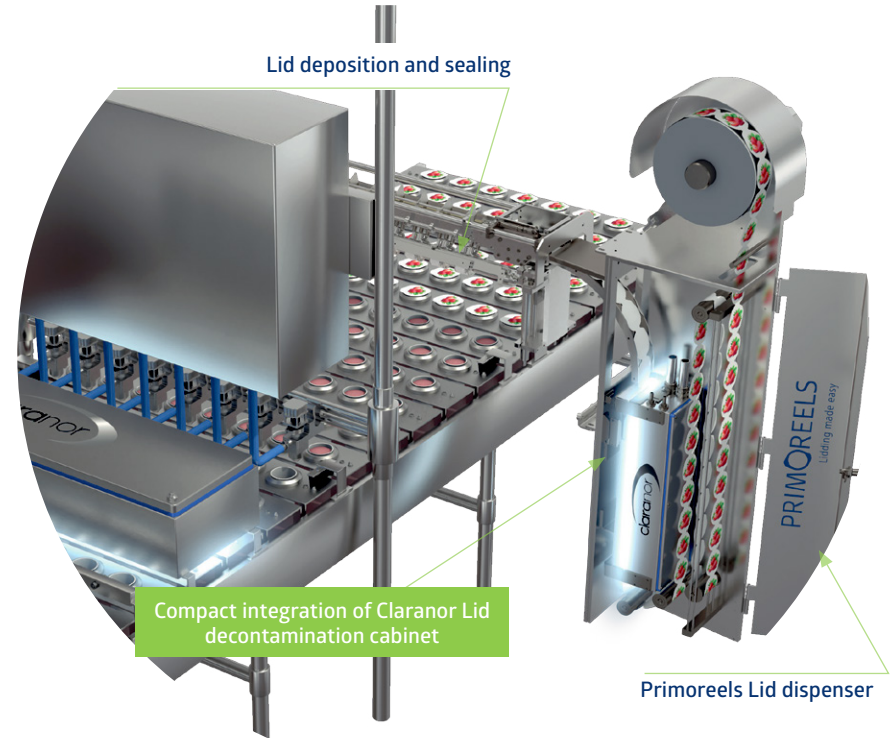

Less surveillance and refilling
Very fast reel change : 2 min/hour
Less handling, better hygiene
Native integration of the Claranor module

FS LINE RETROFIT

SUSTAINABILITY

- The reel principle allows the use of very thin films
- Patented optimal layout reduces film consumption
- Recyclability
- Chemical free decontamination

Lid deposition and sealing

Compact integration of Claranor Lid decontamination cabinet

Primoreels Lid dispenser

SAVINGS

- Higher productivity
- Reduced material cost
- Reduced material volume by 2
- Reduced Pulsed Light Capex and Opex
